FAQs

What is included in the BBB website program?

- Our website program includes a professionally designed one-page website with sections for About, Services, Photo Gallery, Testimonials, Team Members, and Contact Information. We also handle the registration of a custom domain name if your business doesn't already have one.

What is not included in the website program?

- Our website package does not include ecommerce functionality, blog, or online appointment scheduling. It focuses on providing a comprehensive, informative web presence for your business.

Can I keep my website if I cancel the service?

- If you decide to cancel your website service, the website itself cannot be taken with you. The design and content remain the property of BBB.

How often can I update my website?

- Our website package includes unlimited updates. You can update text, pictures, and other content as often as needed to keep your site fresh and relevant.

How long does it take to build my website?

- The turnaround time to build your website is typically 5-10 business days from the time we receive all the necessary information and materials from you.

Can I request specific design elements or features?

- We strive to customize your website to reflect your business's unique brand and needs. While we focus on providing a one-page informational website, you can certainly request specific design elements, and we will do our best to accommodate them within the scope of the package.
